## DENON INTRODUCES NEW S-SERIES 8K AV RECEIVERS

*The Latest High-Performance Surround Sound AVRs Offer Stunning 8K Video, HEOS Built-in Multi-Room Streaming and Voice Control Capabilities*

**Eindhoven, the Netherlands. (October 21, 2021)**—Today Denon®, the world's leading manufacturer of premium home entertainment and personal audio products since 1910, introduced three new S-Series AV Receivers (AVRs), the AVR-S760H, AVR-S660H and the AVC-S660H. Each of the new S-Series AVRs are designed with three 8K HDMI inputs of a total of six to accommodate people looking to upgrade to the latest 8K entertainment and gaming sources. The AVRs were built with the latest technologies to deliver an immersive surround sound experience for movies and music and feature advanced voice control and connectivity options.

“With the new Denon S-Series AVRs, users can build the very best 4K home theater today and know their AV receiver is also 8K ready when they are,” said Trip Randall, president of Denon. “These AVRs offer outstanding features and functionality to meet demanding entertainment needs at an affordable price for customers ready to upgrade from beginner systems or sound bars. With seven channels of discrete amplifications, the AVR-S760H offers extra upgrades, such as Dolby Atmos or DTS:X capabilities for the most realistic, immersive home cinema experience.”

### **AVR-S660H / AVC-S660H 5.2 Channel AV solutions**

The Denon AVR-S660H high-performance 5.2 channel AVR delivers five channels of 75W per channel amplifications (8 ohms, 20Hz-20kHz, THD: 0.08%, 2ch. driven). This simple and solid AVR provides a true-to-life surround sound experience featuring Dolby TrueHD, DTS-HD Master Audio decoding for high-resolution and lossless soundtrack playback. The AVR-S660H features the latest and advanced HDMI specifications such as 8K/60Hz and 4K/120Hz pass-through capabilities on its three HDMI inputs up to 40Gbps, Dolby Vision™, HDR10, HDR10+,

Dynamic HDR and HLG as well as 8K upscaling and HDCP 2.3 support on all HDMI inputs (6 in/1 out). The AVR-S660H also offers HEOS® Built-in multi-room music streaming technology, enabling users to enjoy their favorite content wirelessly in every room. The AVC-S660H does come with the same feature set, however, is a pure AV-Amplifier without FM tuner built-in.

### **AVR-S760H 7.2 Channel AVR: Upgrade to a 3D Audio Experience**

The Denon AVR-S760H high-performance 7.2 channel AVR is a feature-packed home entertainment hub delivering superb audio and video performance. The AVR-S760H features the latest immersive 3D surround formats, an advanced 4K and 8K HDMI video section and HEOS® Built-in multi-room music streaming technology.

With seven channels of discrete amplification rated 75W per channel (8 ohms, 20Hz-20kHz, THD: 0.08%, 2ch driven), the Denon AVR-S760H delivers a lifelike 3D audio experience, leveraging the latest surround sound formats including Dolby Atmos®, Dolby Atmos Height Virtualization Technology, DTS:X® and DTS Virtual:X™. Users can build a stellar 5.1.2 Dolby Atmos surround sound system by installing height or top speakers, or Dolby Atmos elevation speakers atop matching floor standing or bookshelf loudspeakers. Users can also enjoy a multi-dimensional listening experience thanks to DTS Virtual:X or Dolby Atmos Height Virtualization technologies without height or top speakers, or even without surround speakers. This creates the excitement of immersive 3D audio, simplifying installation for rooms where the placement of additional loudspeakers is impractical.

### **Advanced 8K HDMI Video Section with eARC**

To ensure the best picture quality possible, the AVR-S660H, AVC-S660H and AVR-S760H feature an advanced HDMI section including three 8K HDMI inputs supporting 8K/60Hz and 4K/120Hz video pass-through up to 40Gbps. The AVRs are easily connected via eARC (Enhanced Audio Return Channel) to deliver uncompressed and object-based audio from the TV to the receiver via a single HDMI cable. All HDMI inputs (6 in/1 out) boast 4:4:4 Pure Color sub sampling, HDR10, HDR10+, Dolby Vision, Hybrid Log-Gamma (HLG), Dynamic HDR and BT.2020 pass-through support for exceptional clarity. Users can also enjoy 8K upscaling on all inputs and HDCP 2.3, the latest copy protection standard for effortless playback. Gamers also have a host of technologies available for a smoother and quicker gaming experience, including: 4K/120Hz pass-through, Variable Refresh Rate (VRR), Quick Frame Transport (QFT) and Auto Low Latency Mode (ALLM).

### **High Resolution Music Streaming & Multi-Room Support**

The Denon AVR-S660H, AVC-S660H and AVR-S760H are compatible with Apple® AirPlay 2 for iPhone users while the front-panel USB port offers convenient audio playback of other high-resolution audio formats (WAV, FLAC, ALAC and DSD 2.8/5.6 MHz files) from a variety of players. Wireless connectivity to popular streaming music services like Spotify®, Pandora®, Tidal and more are also easily accessed via Bluetooth or HEOS Built-in technology. With HEOS Built-in, both AV receivers can stream music wirelessly across compatible HEOS Built-in products such as Denon Home 150/250/350 wireless speakers from anywhere in the home. Listeners can play the same song in every room or select a different song for each connected room from the HEOS app.

### **Audiophile Heritage & Performance**

Both the Denon AVR-S660H, AVC-S660H and AVR-S760H offer industry-leading sound quality, offering high-resolution audio streaming with support for FLAC, ALAC and WAV files as well as DSD 2.8/5.6MHz. The latest AVRs include a phono input for vinyl enthusiasts to enjoy their collection. With dual subwoofer outputs, listeners can easily add multiple subs to achieve optimized low frequency dispersion for movies or music listening.

### **Improve Accuracy with Audyssey Room Correction**

All new models use Audyssey MultEQ technology for simple, accurate speaker setup and acoustic calibration of the system. The technology detects the size, type and configuration of the speakers used and measures their response in up to six listening positions for optimal performance. With the AVR-S760H, listeners can further customize settings to their liking via the advanced Audyssey MultEQ Editor app, available for purchase in iOS and Android stores.

### **Additional Features & Ease of Use**

With a suite of new updates, all AVRs offer a variety of other benefits. “Dialog Enhancer” lets users to adjust the dialog level on the fly, while a newly added HDMI signal information feature allows users to confirm if 8K60 or 4K120 signals or other HDR formats are passing through the AVR. Additionally, the AVR-S760H offers a “Dual Speaker Presets” feature, enabling users to store and switch instantly between two different speaker configurations and Audyssey settings. The new S-Series AVRs also work with Amazon Alexa, Google Assistant, Apple Siri for voice control of AVR functions.

The new AVRs are easy to set up. Once connected to a TV via HDMI, the Denon Setup Assistant walks users through the entire connection and calibration process fluidly. A row of color-coded speaker connections and conveniently labeled inputs and outputs help new users connect their speakers and devices. The new S-Series AVRs will also automatically rename HDMI inputs when connected but can always be manually changed if necessary.

The AVC-S660H, AVR-S660H and AVR-S760H are available for €529, €549 and €619, respectively, at authorized Denon retailers and [denon.com](https://www.denon.com).
