Wind of Change!

TAV-606F SE

Although TAGA Harmony AUDIO-VIDEO Series can be named "a bargain of the century", there is no place for any sacrifices in music or home theatre performance.

Our devoted to music team of professional engineers and designers has put all its knowledge and heart into building the AUDIO-VIDEO Series: still very affordable but at the same time reliable, with perfect quality, design and sound performance never before found in products of this price range.

TAV OW-60 LCRS

Designed to work in front (left and right), center or surround channels in multi-channel theatre systems.

The speaker is ready for on-wall installations in both vertical and horizontal orientation or can be discreetly placed into custom-built cabinetry. Thanks to its slim design it is an ideal partner for modern curved TVs.

The advanced, high class tweeters, which are available in different configurations depending on a model: **TPTTD-I (Taga Pure Titanium Tweeter Dome)** tweeter with pure aluminum faceplate to enhance sound dispersion.

Soft domes with the specialized horn like **TWG (Taga WaveGuide)** design of the tweeter faceplate utilizing concave diffusers supports equal and flat dispersion of sound in and off the axis of the driver.

The midrange drivers utilizing rigid and ultra-light cones with the elastic rubber suspension can move very fast and frequently allowing mid-range frequencies to be very rich, spacious and sweet.

The bass and bass / midrange drivers utilizing heavy duty voice coils, coil former and cones for increased power handling, can play deep, precise and detailed bass.

The high quality, gold-plated banana binding posts.

The **BOM (Bassreflex Omnidirectional Module)** - low-turbulence and high-velocity ports utilizing concave diffusers for increased dispersion of low frequencies.

Audio-Video series

Active Subwoofers

TSW Series subwoofers are single driver, bassreflex constructions with built-in high-current amplifiers. They deliver the most powerful, deep bass with staggering definition, location and dynamics never met at these price levels before.

Our high-power and high-current amplifiers deliver astonishingly deep, thundering bass with perfect definition.

Advanced subwoofer drivers with the extended cone excursion ensure superior flat power response and ultra-low distortions at any volume levels.

A TSW subwoofer is an ideal complement to your sound system both in stereo and home theatre systems.

Ultra-light and ultra-rigid paper cone bass drivers with light paper dust caps, ferrum injection-molded chassis and oversized magnets offer high power handling as well as deep, precise and detailed bass performance. The rubber, elastic surround supports extended cone excursion.

The TSW subwoofers utilize high-power built-in amplifiers, robust power board structures and high-velocity slotted bass ports on the rear panels. The advanced bass drivers can operate in high amplitude ranges to quickly react on any changes in the audio signal structure. An integrated clipping limiter* maintains the best performance and safe operation of the amp and driver even at extremely high volume levels.

Removable IEC type power cord* provides good power supply filtering and stability and is an easy option to upgrade your system with a premium audiophile power cable in any time.

The TSW series subwoofers are the absolute best buy in subwoofers!
